CERTIFICATION

English Enhancement Programme

📅 11/2019 - 12/2019 📍 Penang, Malaysia

I stayed in Penang, Malaysia for Greenwich's Oversea Program. Staying for a month, I had many chances to talk and work with foreigners who are using English. After this course, I got the certificate.

Best Of Subject

📍 University of Greenwich Vietnam

During the Spring 2021 semester, I was luckily best at IoT subject.

ACTIVITIES

HelloGit Information Technology Club

From April 2021 till now.

Music Project: Minishow 01

This was a charity project last year, me and my friends gathered young people who passionately with art to organize a mini music show for 2 nights. It was a great time to donate for homeless people before Tet holiday.

HOBBIES

Music

After stressful learning time, I usually play guitar and piano to refresh my mind. I used to perform to sing and instruments when I was in high school.

My performance stones:

<https://bit.ly/30V2XLD>

Sport

At the weekend, I sometimes go out to play football, tennis. My daily time in the day includes gymnastic as well. I want to keep my mind, always be smart to solve everything simply.

PROJECTS

E-Commerce Website

📅 05/2020 - 07/2020

Description: This is my first exercise to build a full dynamic website to sell goods. I chose to sell shoes. The website includes modules: managing category, searching products, adding/ deleting/ editing products, printing invoices.

- **Value:** First accessing to dynamic website, I worked as a full stack developer in this exercise.
- **Role:** Full-stack developer.
- **Technologies:** HTML, CSS, PHP and MYSQL.

Developing A Cloud Computing Solution For An E-Commerce Website.

📅 01/2021 - 03/2021

Description: The second project was an e-commerce website as well. After building the website, I uploaded it to the cloud.

- **Value:** I get to know how cloud works and its benefit.
- **Role:** Full-stack developer
- **Technologies:** HTML, CSS, JQUERY, JAVASCRIPT, PHP and MYSQL

Service Landing Page

📅 04/2021 - 05/2021

🔗 <https://github.com/binnehaha321/cookieyman>

Description: I built a page for people to view my Netflix, Vieon, FPT Play service. People can visit and read the supply service. If they accept to buy my service, the site will direct them to another third party page to fill in the information (I used Google Form, Momo, and Banking).

- **Value:** I actualize a website to access to more audiences, getting more traffic and made some real values from my project.

Training System Management

📅 07/2021 - 09/2021

🔗 https://github.com/binnehaha321/FPT_SYSTEM

Description: This is an internal system to manage the training process. The HR department is responsible. There are four different roles in the system: an administrator, training staffs, trainers and trainees. They all have unique functions and manage as a multilevel system.

- **Value:** Get to access with a new framework and working system. I have a teammate to complete this project that lasted 2 months.
- **Role:** FrontEnd developer
- **Technologies:** HTML, CSS, BOOTSTRAP, JQUERY, ASP.NET MVC FRAMEWORK and MYSQL SERVER.

HelloGit Funding Web App

📅 06/2021 - 07/2021

🔗 <https://gwhellogit.com>

Description: HelloGit Funding is an idea of me and my classmate, we have been working in HelloGit (IT club of Greenwich University) for 6 months. Every month we all have to deposit for fund club. Therefore, my friend and I decided to build a website to manage the deposit publicity.

- **Value:** We practised on a real project in a week for the first version. The pressure brought us to many new knowledge and experience. Moreover, we know how well-working in group.
- **Team size:** 3 people (1 FE, 2 BE).
- **Role:** FrontEnd developer.
- **Technologies:** HTML, CSS, BOOTSTRAP, JQUERY, PHP, MYSQL and LARAVEL FRAMEWORK.
